

DOCKET FILE COPY ORIGINAL

RECEIVED

JUN 14 1993

Referred to

rules. In addition, Mobley requests that the Commission modify its license to substitute the proposed Class C2 channel for its existing Class A license.

Channel 295C2 can be allotted to Buckeye, Arizona in accordance with the Commission's spacing requirements with a minor site restriction. Mobley firmly believes that it can find a suitable site within the area restricted for the requested allocation if the Commission adopts its proposal. The proposed channel allotment in Buckeye, Arizona would substantially expand the coverage of Mobley's facilities to areas not now receiving its signal, and thereby enhance its economic viability. If the Commission makes the requested allocation change, Mobley will promptly apply for and construct upgraded facilities on the proposed channel.

Mobley further urges the Commission to adopt as quickly as possible a working arrangement between the United States and Mexican governments to implement the 1992 U.S./Mexico FM Broadcast Agreement.

For the foregoing reasons, the proposed allocation change will provide for a more efficient use of the spectrum and clearly is in the public interest.

Respectfully submitted,

MOBLEY BROADCASTING, INC.
